

INDONESIA URBAN WATER, SANITATION AND HYGIENE Profile of Mojokerto District

Mojokerto District: located 40 KM southwest of Surabaya City and has total population around 1.112.821 inhabitants in 2011.

The construction of infiltration ponds in Claket Village, Mojokerto.

General Overview

Mojokerto is one of the districts in East Java Province, Indonesia. It is located 40 km southwest of Surabaya, and constitutes one of the regional units of 'Gerbangertosusila' Development (a linkage of towns and city connecting Gresik, Bangkalan, Mojokerto, Surabaya, Sidoarjo, and Lamongan, that are supposed to sustain Surabaya as center of business and industrial activities).

Mojokerto's territory is 872 km², located between 15 m and 3,156 m above sea level. It is divided into Mojokerto Municipality and Mojokerto District. In 2011, the total population of the district is about 1,112,821 people spread in 18 sub-districts and 304 Villages. Mojokerto is one of the big five industry towns in East Java, where the central industry are located in Mlirip, Ngoro and Jetis Sub-districts.

IUWASH began its programs in Mojokerto District since October 2011 through a partnership agreement signing between the Head of Mojokerto District and IUWASH. Some implemented program of IUWASH during 2011-2012 are the construction of infiltration ponds as a climate change adaptation initiative in Pacet Sub-district and facilitating the water utility and sanitation entrepreneurs of Mojokerto District to expand access to water as well as sanitation facilities through microfinance scheme.

Safe Drinking Water Condition and Water Utility Service

Recently, the drinking water service in Mojokerto District is provided by Djoebel Tirta Water Utility and Association of Drinking Water Consumers (HIPPAAM). Djoebel Tirta Water Utility has the water supply system with a capacity of 194 liters/second derived from several springs and deep wells spread over 18 sub-districts in Mojokerto, which is divided into four service units. Two largest customers area of Djoebel Tirta Water Utility are located in Pacet and Mojosari Sub-districts.

In 2012, the service coverage of clean water in Mojokerto District only reaches 9.73 percent or 108,269 out of the district total population; 1,112,821 inhabitants. Currently, Djoebel Tirta Water Utility has only 15,467 subscribers. However, it is categorized in good condition and has earned a profit of Rp 1.3 billion with total assets of Rp 14.9 billion and capital of Rp 14.3 billion in 2011.

Challenges in Sanitation Sector

Mojokerto District does not have an integrated drainage (sewerage system). It does not have a Sanitation Working Group and the district also has not joined Settlement Sanitation Development Acceleration Program (Program Percepatan Pembangunan Sanitasi Permukiman/PPSP) yet. The poor sanitation condition was also aggravated by high number of open defecation practices. There are still many community members who defecate on the river. The communal toilets remain inadequate while many individual toilets mostly were not built with proper septic tanks.

In order to increase the poor sanitation of the district, IUWASH then facilitated the establishment of Sanitation Working Group and encouraged the local government in allocating funds to undertake PPSP activities so that Mojokerto District will able to follow PPSP in 2013.

IUWASH Program Priorities to Support Mojokerto District in 2012-2013:

- Improve public access to clean water;
- Increase public access to proper sanitation;
- Improve performance of Djoebel Tirta Water Utility in management, technical and financial (non-renewable water level, geographic information systems, billing and accounting);
- Reduce the non-renewable water level;
- Monitor the debt restructuring program;
- Conduct raw water vulnerability studies and adaptation to climate change;
- Conduct capacity building of Drinking Water and Environmental Health working group through trainings;

- Assist the local governments to strengthen policies of clean water and sanitation sector;
- Assist the local government budgeting on water and sanitation sector (including long-term financing);
- Support and promotion for Community-based Total Sanitation (STBM) Program;
- Increase community involvement for drinking water and sanitation program;
- Support the preparation of local community and civil society groups for Community-based Environmental Sanitation (SLBM) program.
